LANGUAGE

- Python
- Java
- C++
- HTML
- CSS

DATABASES

- MySQL
- MongoDB

EDUCATION

COMSATS University Islamabad
Bachelor of Computer Science
2021-2025(expected)

PROJECTS

Desktop AI

Desktop AI is developed using Python. Also using different APIs such as OpenAi, Weather, and News. It includes the following features:

- This desktop AI is named Shaafeeq and it can chat with the user as I am using the speech recognition package here.
- It has the ability to answer my questions and save the solutions in a well maintained folder.
- It has the ability to tell time, date, weather forecast, top news in the world, and much more.

Bakery Management System

Bakery Management System is made using Python. It includes the following features:

- Item menu, Customer menu, Sales menu.
- Addition, Deletion, Viewing, Editing, and Searching in these menus.
- Calculating total bill.

MediCare System

MediCare System is made using Java with the help of file handling as the storage of data. It includes the following features:

- Doctor's page, Patient page, Admin page.
- Admin can monitor all the appointments and can generate bills, Doctor can see all of his appointments, Patients can see all the doctors that are available and book his appointment according to that.

Travel and Tourism

The travel and Tourism system is made using Java with the help of MongoDB for the storage and manipulation of data. It includes the following features:

- Customer Login, Signup
- Addition of destinations with all of the stuff
- Booking of tourism plan.
